Superadmin should be able to
1. Create/delete accounts, reset passwords and all access to all admin templates

Admin Should be able to:
1. Create/delete sub accounts that use the templates they create.
These templates can be exported/shared, and used by other admins
2. slightly edit standard templates that have the following features:
A. Create LINE CATEGORIES name and color the category
B. Edit the text in ? button , choose 1 of 2 types: 1. Informative 2. Text template to copy for emails for each colomn
[these "info" buttons need to be SEPERATED BY CATEGORY Chosen] >>>> because each company has slightly different process
C. Create and select Trigger Event for any box that is checked (for that specific column). These are essentially forced popup reminders to do something
then click "ok" once you've done it (externally)

Users Should be able to:
1. ADD a line using the + NEW button to select category, Checkmark check columns, fill text column boxes, enter dates on date columns. (no order is required for marking tasks)
2. Some fields require a dates to be input, date fields can have parameters to turn orange and red based on deadlines (yellow 6 days, red 3 days)
3. Organize their lines manually by dragging them or by sort button
4. Delete the line by marking it t/l or complete/delivered
5. Click on ? to read more about that column

Done and clear line
button only avaliable once
all tasks are completed
OR T/L button is selected

if this red button is clicked
the following happens:
entire line turns red except
the final step column and FINISH flag

3 types of triggers when completing task, depending on how admin set it up
FOR THAT PARTICULAT COLUMN

Popup Notification with OK button
dont forget to do this thing! OK → Turn Green
OR Popup test box to copy something then
click OK button

Turn Green

You just finished doing
